## OBJECTIVE

Seeking a developer position, to bring my skills as a self taught, passionate programmer to their company and team. I hope to learn from the development team for my personal growth, and to move the company forward. I want work with a company that uses a language like Go, JavaScript/NodeJS, and Python, developing technologies that move the company ahead of its competitors.

## SKILLS/ACHIEVEMENTS

- For the majority of my working career I have worked to elevate small businesses with expertise of sales, IT, management, and software development.
- I used to Freelance web development for few small to medium Insurance and web service companies
- I am a passionate developer, and run my own blog to share my experiences (<http://dtoebe.com/>)
- Any free time I have I enjoy writing programs in various different languages (Python, Java, JavaScript, Go, Rust, C++/Qt, Qml) (GitHub: <https://github.com/dtoebe>)
- As you will see with my previous work experience I am a very flexible, loyal, hard worker, and quick to adapt to change.

## EMPLOYMENT

### IT/Web Manager, Ecigsupply LLC, Phoenix Az, 26th Ave Deer Valley

*From: 11-2010 to 9-2016*

- Manage Office, and assist in directing warehouse operations.
- Manage internal IT infrastructure, and any software development needs
- Manage/Maintain all of the Ecigsupply LLC’s websites.
- This lead me to use a wide variety of technologies, such as Cloud hosing systems, Node JS, Python, PHP, GoLang, JavaScript (with various frameworks: Angular, React, jQuery), and pre built solutions.
- I over sought inventory/shipping software systems, websites maintenance and deployment.
- I have learned how to conceptualize and develop server and client side software under stringent deadlines.
- Much of what I did was conceptualize and develop API endpoints to allow different services to communicate

### Sales/IT/Web/Marketing Manager, Mangnum’s, Phoenix Az, 7th Street Union Hills

*From: 10-2004 to 6-2006; and brought back at: 4-2008 to 11-2010*

- Initially I was brought in to manage sales of high-end wine, beer, spirits, and cigars, but I set up internal network, and POS systems.
- I had left for a couple years and brought back to again manage Sales/IT during their expansion, as well as set up a web presence.
- Managing Sales, Networking, Web Development
- I worked with tool sets such as, C#/.Net, JavaScript, PHP, and Action Script.

### Owner of Toebe Technologies

*From: 5-2010 To: 9-2013*

- I ran this on the side with the permission of my bosses at the time.
- I did a wide variety of work for many different companies such as, Linux administration, CMS development, WordPress Development, client-side JavaScript development. Server tool development in Bash, C/C++ Python

### Discover Card, Phoenix Az 101 and I-17

*From: 6-2006 to 4-2008*

- I was product retention, basically I had to keep customers on extra card benefits, and also sell them on new benefits
- I really learned how to manage upset customers and promote the benefits to the brand I support.
- With this position I was constantly rewarded for my exceptional work, because I was able to learn fast and adapt to changing environments.
